**Ketchikan, Alaska**

This southern-most Alaskan port city is known as Alaska's First City because it was the first major community travelers came to heading north. Founded as a fishing camp, Ketchikan is built on steep hillsides and is billed as the salmon capital of the world. A quaint village, the town is just three miles long and three blocks wide.

**Juneau, Alaska**

From their discovery came three of the largest gold mines in the world. By the end of World War II, more than \$150 million in gold had been mined. Eventually the mines closed, but the town Joe Juneau founded became the capital of Alaska and the business of gold was replaced by the business of government. Today Juneau is famous not only for gold and government but also for its breathtakingly beautiful glaciers and stunning views of both water and mountains.

**Skagway, Alaska**

Skagway was the gateway to the gold fields for the thousands who flocked to Alaska and the Yukon with the hope of striking it rich. Skagway may have boasted the shortest route to the Klondike, but it wasn't the easiest. Over 100 years ago, the White Pass route through the Coast Mountains and the shorter but steeper Chilkoot Trail were used by countless stampedes'. Many a would-be miner perished on the treacherous Chilkoot Trail.

**Glacier Bay National Park, Alaska (Scenic Cruising)**

Princess is one of a select few cruise lines permitted to cruise the pristine waters of Glacier Bay, the highlight of our 7-day Voyage of the Glaciers cruise. Just west of Juneau, this breathtaking national park and preserve boasts some of the world's most spectacular tidewater glaciers, such as Margerie Glacier, which often drops colossal chunks of ice into the sea. Not surprisingly, Glacier Bay National Park and its epic ice giants are part of a UNESCO World Heritage Site comprising Alaska's magnificent park system.

**College Fjord, Alaska (Scenic Cruising)**

Discovered in the northwest corner of Prince William Sound during an 1899 research expedition, spectacular College Fjord and its glaciers were named after prestigious east coast schools by the college professors who first laid eyes upon their majesty. Stretching for miles, these massive rivers of ice tumble down from mountains and through valleys, dipping into the pristine waters of the fjord.
